Zemen progress from day one

Source: production Supabase · customers & providers only · pulled 21 Oct 2026. First accounts: March 31, 2026 (~204 days). Bookings excluded.

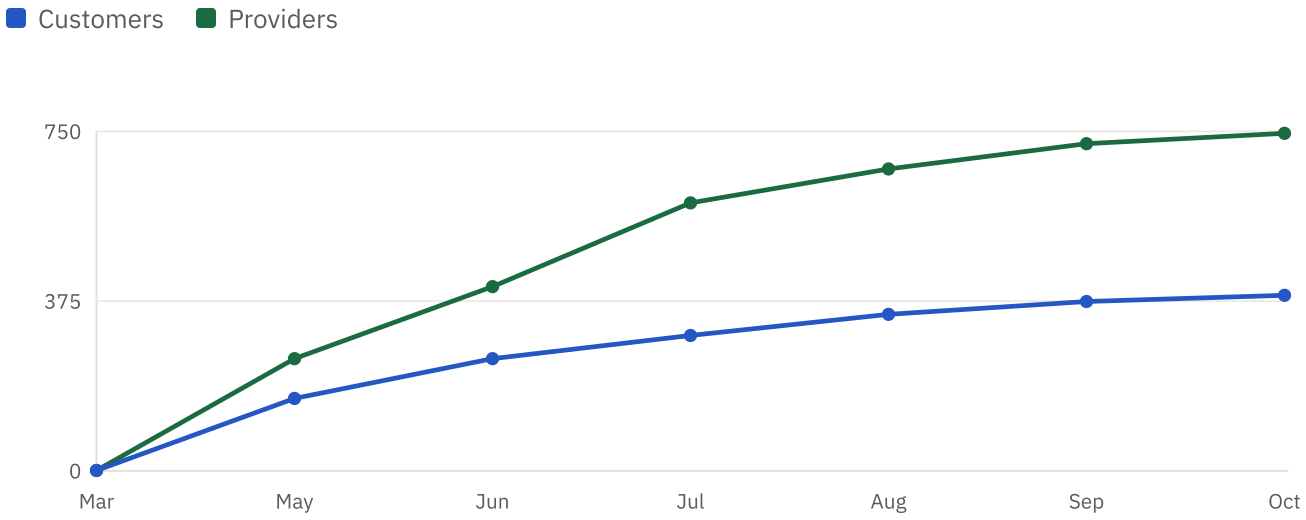

Soft launch end of March, real scale-up in May–July (especially providers), then new signups cooled every month through October. Platform is still supply-heavy vs demand-side accounts.

New signups per month

Peak provider intake May–Jul. October is a partial month.

Phases

Phase	When	What the data shows
Seed	March 31	First provider and first customer appear (one each).
Supply ramp	May–Jul	Providers jump from one to 592; customers from one to 299. Heaviest acquisition window.
Cooling	Aug–Oct	New signups slow every month on both sides.

Account health

Metric	Value	Read
Providers / customers	746 / 388	Supply-heavy (~1.9 providers per customer)
Activation paid	107 / 746	Only ~14% of providers show activation_paid
Provider.active flag	746 / 746	All true in this snapshot — use activation_paid, not active
